Kafeterija, poznati lanac kafića iz Srbije, postala je mesto inspiracije i kreativnosti za arhitekte studija KIDZ. Koristeći kafić kao alternativnu kućnu kancelariju, tim KIDZ-a često je radio unutar njegovih ugodnih zidova tokom godine, nastavljajući da razvijaju nove koncepte za svoje projekte. Saradnja između KIDZ-a i Kafeterije započela je pitanjem: "Možemo li raditi ne samo u Kafeteriji, već i zajedno sa njom?" Prvi sastanak, održan u julu 2023., označio je početak projekta. Studio je zamoljen da maksimalno iskoristi svoju viziju idealnog prostora za goste. Analizirajući lokaciju Kafeterije, KIDZ je uхватио duh radionice, gde je svaki proizvod jedinstven, a interijer naglašava zanatstvo i prirodne materijale. Budući kafić pronašao je dom u istorijskoj zgradi sa zidovima od cigala i vitražnim prozorima, gde je pre bio lokalni bar. Kako bi stvorili pravu radionicu, prvi korak bilo je izbeljivanje zidova i stvaranje otvorenog prostora. To je osnova na kojoj su kasnije dodani atributi kafića - šank, sedišta za posetioce. Mnogi objekti u

sobi sastavljeni su od onoga što je pronađeno tokom demontaže i građevinskih radova: na primer, šank i klupe izrađeni su od nekoliko vrsta drveta preklapajući se koristeći tehniku patchworka. Rešenje osvetljenja, napravljeno korišćenjem skele i spojnicu od metalnih cevi, ne samo da doprinosi dizajnerskim karakteristikama, već rešava i praktičan problem maskiranja električnih kablova. Upotreba fasadnih pločica na terasi dodala je čisti i uredan osećaj prostora, stvarajući osećaj jedinstva s okolinom. Tokom procesa obnove, otkriveni su i obnovljeni elementi izvorne arhitekture, uključujući drvena vrata i vitražni prozor na fasadi, čime je sačuvan izgled zgrade. Rezultat rada studija je prostor koji kombinuje poštovanje tradicije i modernih dizajnerskih rešenja, odražavajući filozofiju Kafeterije kao mesta gde svako može pronaći nešto što odgovara njegovom ukusu u atmosferi kreativnosti i zanatskog rada.

Kafeterija, a well-known Serbian coffee shop chain, became a place of inspiration and creativity for the architects of KIDZ studio. Using the coffee shop as an alternative to a home office, the KIDZ team often worked within its cozy walls during the year, continuing to develop new concepts for their projects. The collaboration between KIDZ and the Kafeterija began with the question, "Can we work not only in the Kafeterija but also together with it?" The first meeting, held in July 2023, kicked off the project. The studio was asked to maximize its vision of the ideal guest space. Analyzing the locations of the Kafeterija, KIDZ captured the spirit of the workshop, where each product is unique and the interiors have an emphasis on craftsmanship and natural materials. The future coffee house found its home in a historic building with brick walls and stained glass windows, where before there was a local bar. To create a true workshop, the first order of business was to whitewash the walls and engineer in the open. This is the base on which the attributes of a coffee shop - a bar counter, seats for visitors - were

later added. Many objects of the room were assembled from what was found during the dismantling and construction process: for example, the counter and benches are made of several types of wood overlaid on each other using patchwork technique. The lighting solution, made using scaffolding and metal pipe clamps, not only adds to the design features, but also solves the practical problem of masking the electrical cables. The use of facade tiles on the terrace added a clean and tidy feel to the space, creating a sense of unity with the surroundings. During the renovation process, elements of the original architecture were also discovered and restored, including a wooden door and a facade stained glass window, preserving the look of the building. The result of the studio's work is a space that combines respect for tradition and modern design solutions, reflecting the Kafeterija's philosophy as a place where everyone can find something to suit their taste in an atmosphere of creativity and craftsmanship.
