LAKE HOUSE no.3 / AZ

PROJECT DESCRIPTION IN MOTHER TONGUE
RO Descrierea proiectului în limba maternă HU A projekt leírása a pályázó anyanyelvén SRB Opis projekta na maternjem jeziku

Proiectul este dintr-o serie de case pe lac pe care le-am inceput in aceasi perioada. Fiecare proiect conduce catre dialogul dintre noi si beneficiar. Se repasesc multe spatii difrente de-a lungul casei. Disponibilitatea de a crea diferte atmosfera a fost prezenta de la a doua testarea unui ambient diferit. Casa este foarte luminoasa avand deschidere catre lac, ceea ce ne-a permis sa lucrăm cu materiale sau culori inchise. Cateva elemente ne-au dirijat gandirea din spate. Primul element a fost ritmul, parcursul caselor fiind unul important si bineintele-

deschiderea catre lac ce a condus la un parcurs gradual spre un living cu dubla inaltime. Relatia casa lac a fost luata in considerare si in crearea livingului, centru de interes fiind privirea si in plan secund seminebul, sau scara... ambele fiind foarte prezente din punct de vedere al dimensiunii spatialei. Cadru de proiectie a fost setat de ritm, relatia casa lac si contrast, lemn-beton.

PROJECT DESCRIPTION IN ENGLISH
RO Descrierea proiectului in engleză HU A projekt leírása angol nyelven SRB Opis projekta na engleskom

The project is from a series of houses on the lake that we started in the same period. Each project leads to the dialogue between us and the beneficiary. There are many different spaces throughout the house. The availability to create different atmospheres was present which led to testing a different environment. The house is very bright, opening to the lake, which allowed us to work with materials or dark colors. Several elements directed our thinking behind. The first element was the rhythm, the course of the house being an important one and of course the opening to the lake which led to a gradual path towards a living room with double height. The relationship between the house and the lake was also taken into account in the creation of the living room, the center of interest being the view and in the background the fireplace, or the staircase... both being very present in terms of the size in the space. The projection frame was set by rhythm, the relationship between lake and interior space and contrast, wood-concrete.
