PROJECT DESCRIPTION IN MOTHER TONGUE

RO Descriverea proiectului in limba materna HU A projekt leírása a pályázó anyanyelvén SRB Opis projekta na maternjem jeziku

Tokom ubrzaniog urbanog razvoj Beograda u poslednjih 10-15 godina, preovladujući trend je brza gradnja kako bi se zadovojila velika potražnja za novim stanovima. To je dovelo do smanjenja kompleksnosti arhitekture izazvane dizajnom, a samim tim i primetno širenje bezličnih fasada gde je jedini element dizajna CNC sećena balkonska ograda. Gotovo uvek

obojena u crno, sa svega nekoliko varijacija u isečenim oblicima. Zgrade koje su ovde predstavljene nalaze se u različitim delovima grada, gradili su ih različiti investitori, sve u poslednjih 5 godina.

PROJECT DESCRIPTION IN ENGLISH

RO Descriverea proiectului in limba engleza HU A projekt leírása angol nyelven SRB Opis projekta na engleskom

In the accelerated urban development in Belgrade for the past 10-15 years, the predominant trend is to build fast in order to meet the high demand for new apartments. This has led to the reduction of possible complexity caused by architectural design, and so the noticeable spread

of featureless facades where the only design element is a CNC cut balcony fence. Almost always painted black, with only few variations in cutout shapes. Buildings presented here are located in different parts of the city, built by different investors, all within the past 5 years.
